

Vorlesung 56505-01

Genetic Approaches in Biomedical Research

Fridays, 12.15 – 13.15 hr, Biozentrum Room 103

Date	Speaker	Title
28.2.2020	Dr. Sophia Wiedemann DBM, Basel	The multifaceted role of the cytokine Interleukin-1 β in the physiology of food-intake
6.3.2020	No lecture	Fasnachtsferien
13.3.2020	Dr. Pawel Pelczar University of Basel	Overview of the transgenic techniques "CANCELLED"
20.3.2020	Dr. Jan Kisielow ETH Zurich, Tepthera Ltd.	Chimeric receptors for deciphering of T cell reactivity
27.3.2020	Dr. Madhurima Benekareddy Hoffmann-La Roche, Basel	tba
3.4.2020	Dr. Jan Tchorz Novartis Pharma AG	Liver Stem Cells – Fact of Fancy
10.4.2020	No lecture	Karfreitag
17.4.2020	Dr. Anastasiya Börsch Biozentrum	Inferring gene regulation from transcriptomic data
24.4.2020	Dr. Flavie Ngo Nyekel Biozentrum	Dynamics of mice gene expression during typhoid fever
1.5.2020	No lecture	Tag der Arbeit
8.5.2020	Dr. Rui Lopes Novartis Pharma AG	Functional dissection of the estrogen receptor pathway in breast cancer
15.5.2020	Dr. Charisios Tsiaris FMI, Basel	Genetic and mechanical inputs that modulate hydra regeneration
22.5.2020	No lecture	Auffahrt
29.5.2020	Prof. Josef Kapfhammer DBM, Basel	Purkinje cell dendrites, Protein Kinase C gamma and spinocerebellar ataxia

Organizers:

Prof. Raija Lindberg (061 2652608)
PD Dr. Birgit Ledermann (061 3243474)
PD Dr. Nicolau Beckmann (079 6181865)
Dr. Pawel Pelczar

Supported by Kontaktgruppe für Forschungsfragen
